---

The Speech and Learning Institute, Inc. provides assessment and treatment for adults age 18 to geriatric. Our services include evaluation and treatment of the following speech and language disorders:

- Aphasia
- Articulation
- Auditory Processing
- Augmentative/Alternative Communication
- Cognitive-communication disorders resulting from brain injury
- Dysphagia/Swallowing
- Language Comprehension
- Memory
- Motor Speech Disorders
- Myofunctional/Tongue Thrust
- Voice

### OTHER SERVICES

#### Accent Modification

The Speech and Learning Institute, Inc. offers accent modification training. An assessment is completed to analyze articulation, grammar and voice patterns for non-native Standard American English speakers. This treatment plan is designed to address specific pronunciation patterns in conversational speech. Goals are designed to improve the client's intelligibility when using Standard American English.

#### Voice Coaching

Voice coaching is used to enhance the client's voice. Many professionals use an inappropriate speech rate, speaking pitch, or loudness level. Our certified clinicians assist clients as they modify their voice to improve their overall vocal presentation.
