Individualized tutoring sessions are offered onsite or in your home. Our tutoring staff has been trained to enhance academic skills by targeting your child's preferred learning method through use of a multi-sensory approach.

Tutoring is offered to children of all ages and ability levels. Our tutors may target the following areas; emergent reading, reading, math, writing, and study skills. All tutors are certified teachers and have been formally trained in the Orton-Gillingham method of reading and Hand Writing Without Tears. Each tutor has experience working with typical developing children as well as children on the autism spectrum and with other developmental challenges.
